BornTec deploys CrossCheck™ to our clients within days. Screens can be customized to meet end-user preferences.

**Surveillance**
CrossCheck™ enables real-time trade flow surveillance and can address RTS 6 technical standards.

**Compliance**
Key solution features for compliance include real-time market abuse monitoring and turnkey regulatory reporting.

**E-Solutions Support**
CrossCheck™ trade flow administration features include the visualization of real-time global trade flow through a single screen.

**Data Visualization**
Unique dashboard functions include the visualization of multiple, customized client leader boards and global risk exposures.

The CrossCheck™ demonstration takes approximately one hour. BornTec system deployment experts lead the presentation.
